Summary

Unity game programmer with 6+ years building and shipping games for mobile, WebGL, Steam, AR/VR and interactive LED installations. At Yes2Games I write gameplay code and lead QA as Person in Charge, and helped ship NSR Street Car Racing (100K+ downloads on Google Play). Comfortable owning both the code and the QA process, from test plan to release.

Work Experience

Unity Game Programmer & PIC QA · Yes2Games — **Jun 2025 – Present**

Game development, licensing and distribution company (Unity, WebGL and mobile) — *Remote, Singapore*

- Shipped **NSR Street Car Racing** on Google Play (100K+ downloads, 4.3★) and Poki (4.6★ from 36K+ votes).
- Person in Charge of QA: own test plans and test cases, run functional, regression and smoke testing, track bugs and verify fixes before release sign-off.
- Build gameplay features, fix bugs and optimize performance in Unity and C#.
- Migrated NSR from the Built-in Render Pipeline to URP and made its car shaders and other materials.
- Prepare and optimize WebGL builds for Poki and Android builds for Google Play.

Unity Game Programmer · DFactory Visual — **Apr 2025 – Jun 2025**

Creative stage visual studio for immersive and interactive experiences — *Surabaya, Indonesia*

- Lead programmer on **Disney Piano**, an LED floor and wall rhythm game at Pakuwon Mall Surabaya for Disney, using Hokuyo LIDAR to track players in real time.
- Built **Adelle Score Board**, a touchscreen iPad app for Adelle Jewellery events.
- Built an interactive 3D **Product Display** and real-time **LED Visual Animation** for large LED screens.
- Integrated Orbbec, Hokuyo LIDAR and Kinect v2 sensors, and built custom Unity tools to speed up production.

Unity Programmer · Shireishi Production — **Oct 2023 – Jan 2025**

Game studio based in Malang — *Remote, Indonesia*

- Programmer on two Steam titles, **Magica Planta Botanica** and **School Beat**.
- Built a CSV-to-Unity Localization converter and in-game language switching for Magica Planta Botanica.
- Prototyped NPC behavior, area teleport, character data and vending machine systems on TopDown Engine for School Beat.

Game Developer Trainer · SMA 1 Puri Mojokerto — **Sep 2023 – Aug 2024**

Extracurricular program — *Mojokerto, Indonesia*

- Designed and taught a Unity game development curriculum and guided students through hands-on game projects.

Freelance 3D Animator · Ardilab — **Aug 2023 – Jul 2024**

Freelance — *Remote, Indonesia*

- Rigged and animated 3D characters and assets to client specifications, revising based on client feedback.

Part-time Unity Programmer · GingerSun Games — **Dec 2022 – Sep 2023**

Mobile game startup — *Sidoarjo, Indonesia*

- Programmer on **Unrivaled Heroes**, a 2.5D beat 'em up: migrated the project from Unreal to Unity and moved gameplay from 2D to 3D with a 2.5D look.
- Implemented gameplay mechanics and UI from the GDD in Unity and C#.

Game Developer · Digital Artha — **Jan 2022 – Aug 2022**

Mobile game studio based in Tangerang — *Remote, Indonesia*

- Solo programmer on **HaremKing – Kode Keras Cowok 3**, a mobile visual novel with match-3 gameplay.
- Created a text-based story script format with simple commands for writers, plus chat, matching, dress-up and gacha systems, in Unity, C# and Lua.

Game Programmer · Game5Mobile — **Jul 2021 – Oct 2021**

Mobile game studio based in Surabaya — *Remote, Indonesia*

- Prototyped hyper-casual games with the team under tight deadlines for delivery to publishers.

Game Developer · Strategy Max **Sep 2020 – Apr 2021**

Mobile game startup *Surabaya, Indonesia*

- Main programmer and game designer on **G:Project** and **G:Escape**, mobile space arcade games; built the game manager linking gameplay, achievements, shop and sound.
- Handled IT support: PC builds, network setup and device troubleshooting.

Game Programmer (AR/VR) · TicTech Studio **Jan 2020 – Aug 2020**

AR/VR solutions studio *Surabaya, Indonesia*

- Built AR and VR client apps, including the Klikuark AR magazine (PT Kuark International), GIZ solar panel VR training and the Petro 360 plant tour for Petrokimia.
- Integrated Mapbox and REST API data in Unity, and set up AR markers, scenarios and scene flow.

Programmer · Pixelesthe Studio **Jan 2017 – Aug 2019**

Game studio *Surabaya, Indonesia*

- Programmed scene flow and tweening for Mojiken Studio visual novels, and built all game code for Yumi, an educational drawing game.

Education & Achievements

Bachelor of Applied Science in Game Technology, Politeknik Elektronika Negeri Surabaya **2016 – 2023**

- Grand Finalist, Gameseed 2023
- Chief Lab Assistant, Game Technology Lab (2018)
